Discover the very magic switch, which makes Vims regular expression syntax more like Perls. Build complex patterns by iterating on your search history. Search inside multiple files, then run Vims substitute command on the result set for a project-wide search and replace. All without installing a single plugin! Youll learn how to navigate text documents as fast as the eye moves--with only a few keystrokes. Jump from a method call to its definition with a single command. Use Vims jumplist, so that you can always follow the breadcrumb trail back to the file you were working on before. Discover a multilingual spell-checker that does what its told. Practical Vim will show you new ways to work with Vim more efficiently, whether youre a beginner or an intermediate Vim user. All this, without having to touch the mouse.
