

Quetico Park in northwestern Ontario celebrates its 100th anniversary in 2009. Long-recognized as a gem among parks, Quetico contains some of the largest stands of old-growth red and white pine in Canada, as well as a diversity of fascinating lichens, carnivorous plants in specialized habitats. The author presents an insightful look into Queticos natural history as he examines the adaptations that have allowed moose, white-tailed deer, wolves and other mammals to survive. The human history of the park is also explored, beginning with the Objwa living there when the area was designated as a park, followed by accounts of trappers, loggers, miners, park rangers, and poachers. Beginning with the retreat of the glaciers, the author combines his thorough research into Queticos long and varied history with the threads of his own extensive involvement with the park. The result is a splendid tribute to a very special place.
