

In 1953 Nova Scotia zoologist Sherman Bleakney made a surprising discovery. He found a female Blandings turtle living near Kejimkujik Lake. Until then, scientists did not know that the freshwater Blandings turtles lived in Nova Scotia. In 1990, this small population of Blandings turtles in southwestern Nova Scotia became a protected species and three years later was designated a threatened species. Set in Nova Scotias Kejimkujik National Park, this remarkable story is about a young Mikmaw girl and her familys encounter with a Blandings turtle hatchling. Richly illustrated by the award-winning artist Jeffery C. Domm, The Hatchlings Journey provides us with first-hand experience observing the turtle hatchlings emerging from their nests and their fascinating journey into the Kejimkujik woods for winter. Nominated for a 2005 Hackmatack Award.
